

What Does That Mean?

Psychic

The word psychic derives from the Greek word psyche, meaning soul. Therefore, psychic means “pertaining to the soul.” Psychics utilize the five psychic senses to obtain information from the Spirit world and convey it to their clients. The psychic senses are Clairvoyance (clear seeing), Clairaudience (clear hearing), Clairsentience (clear feeling), Clairgustance (clear tasting), and Clairance (clear smelling). These are all ways in which Spirit can communicate with the reader.

Medium

A medium is a Psychic who is able to communicate with loved ones who have crossed over. They can feel, hear, and sense thoughts, voices, physical or mental impressions from the Spirit world. They can connect loved ones in the Spirit world to those here in the physical world to assist with healing and messages. All Mediums are Psychic, but not all Psychics are Mediums.

Intuitive

Being intuitive means that you are able to tap into subconscious information in order to receive guidance about your everyday life. Intuition can be used to receive guidance about your own life (personal intuition) or to help other people (professional intuition). People who are intuitive are not necessarily psychic. Being intuitive is about receiving guidance to make better decisions in your life, and helping guide others in theirs.

Empath

Empath means that you feel other people's emotions as your own. For example, if someone around you is very angry you might start to feel angry yourself, even though there is no direct reason for you to feel this way. Empaths are able to scan another's energy for thoughts, feelings and possibly for past, present, and future life occurrences.

Reiki

The word Reiki is composed of two Japanese words - Rei and Ki. Rei can be defined as the Higher Intelligence that guides the creation and functioning of the universe. Rei is a subtle wisdom that permeates everything, both animate and inanimate. Ki is the non-physical energy that animates all living things. Ki is flowing in everything that is alive including plants, animals and humans. When a person's Ki is high, they will feel strong, confident, and ready to enjoy life and take on its challenges. When it is low, they will feel weak and are more likely to get sick.

With the above information in mind, Reiki can be defined as a non-physical healing energy made up of life force energy that is guided by the Higher Intelligence, or spiritually guided life force energy. This is a functional definition as it closely parallels the experience of those who practice Reiki in that Reiki energy seems to have an intelligence of its own flowing where it is needed in the client and creating the healing conditions necessary for the individual's needs. It cannot be guided by the mind, therefore it is not limited by the experience or ability of the practitioner. Neither can it be misused as it always creates a healing effect.
